Judge Name: **Room #:**

SPARKATHON 2025 | JUDGING RUBRIC TEAM

PROMPT | How can might we enable tech-naïve customers to recognize and resist online scams? (Propose a solution)

Instructions for Judges: Please score the team on a scale from 1-5 for each category. (Decimal points are valid scores. For example, 4.5 would be an acceptable score)

Category	Fair (1)	Good (3)	Outstanding (5)	Score
RESEARCH: Did the team identify a specific **user group** and discover **unmet needs**?	Team specified a **vague** user group and identified **weak** underlying need.	Team specified a user group with limited characteristics, and found underlying needs for the user's problems.	Team identified a **unique and specific** user group with clear characteristics, and found **insightful / surprising** underlying user needs.	
DEFINE: How well is the **problem statement** stated?	No clear problem statement.	Team proposed a problem statement that addressed the user's needs.	Team stated a **clear** and **specific testable** problem statement addressing the user's unmet needs, **clarifying** the digital context and challenge.	
IDEATE: Did the team explore the **solution space** and propose one prototype concept?	Team did not explore alternatives, and created a prototype that **does not** satisfy the user's needs.	Team offered a few alternatives, and designed a solution to satisfy the user's needs.	Team explored **multiple innovative** alternatives, prioritized, and proposed one **insightful** solution to satisfy the user's needs.	
TEST: Did the team test the **prototype***, receive **feedback**, and create **iterations**?	Team created a solution, but did not test it.	Team created a prototype, requested feedback, and designed improvements.	Team created a **detailed prototype**, identified **success metrics**, received feedback, and created **improvements** or **iterations**.	
*A fully functional prototype is not required			Total	/20
